Wokingham Dementia Care Advisory Service

Wokingham Dementia Care Advisory Service is part of Wokingham Community Older Adult's Mental Health Service (COAMHS).

The service is for anyone with a dementia diagnosis living in Wokingham Borough and anyone can refer.

The diagnosis of dementia can cause a great deal of anxiety and you may have many questions.

Dementia Care Advisors are a consistent point of contact, providing confidential support whenever it is needed.

We can provide advice, information, and signposting to anyone living with dementia and their carer/family or friends.

This could be advice about benefits, services provided by health and social care, longer term planning, living well with dementia and much more.

We work closely with local community, faith and voluntary services who are delivering dementia activities. We offer carer support and attend local groups.

If you have dementia, you should continue the activities you enjoy. It is also important to:

- Keep physically and mentally active
- Spend time with family and friends
- Consider getting involved with local groups

If you are caring for someone living with dementia, remember:

- It can help to talk to others
- You will not “get it right” all the time
